STUDIO 1

- Features a 25'x25' studio space with 13' ceilings (10' to light grid) and is the focal point of most Big Whig Media productions.
- Sports a handy 10' x 10' wide green screen for shooting stand-ups on-demand.
- Ross Cambot heads on Miller air-cushioned pedestals make framing any shots with our three Sony HXC-P70 cameras a snap.
- Each camera is equipped with CueScript through-the-lens teleprompter heads.
- The studio space features a customizable anchor desk that can support up to five people.
- The anchor desk itself features NEC monitors as well as 3 additional NEC monitors around the studio walls that can be adjusted.

STUDIO 2

- Studio 2 is a 20'x20' space with 11' ceiling (8'6" to light grid) and is the home of many of our podcast productions. We can record and use CueScript through-the-lens teleprompter heads for script reads.
- Studio 2 features a moveable lower style 4-person desk with a center background monitor and an adjustable monitor attached to the desk. The space is fully customizable to fit a fire-side chat style set up adding a natural element to productions.
- Features an 8' x 8' green screen for stand-up needs.
- Fully equipped with LED lighting with unlimited color choices, without the typical heat and intensity of traditional lighting systems.

CONTROL ROOM

- Our state-of-the-art control room can handle any type of production.
- The control room allows us to directly feed content to Satellite and Fiber end-users as well as all leading online platforms such Zoom, Microsoft Teams, WebEx and others.
- While you might be alone in the studio, you're never "on your own." Our team can actively communicate with our in-studio talent, remote talent, on-set crew and producers through our communications system.

ROOF-TOP CAMERAS

- Two Remote Cameras with Robotic Controls
- Live Rooftop Camera Feed Sent Directly to Our Studios
- Uncompromising Broadcast Picture Quality
- Smooth, Silent PTZ Operation
- Available 24 Hours a Day
